SOFTWARE ENGINEERING EXPERIENCE

Smart Business Technologies / Yandex Cloud 2022 - 2026
Senior Software Engineer, Platform / Technical Lead Serbia

- Led the migration of Cloud Console and UI services from VM-based instance groups to Kubernetes, standardizing deployments and simplifying infrastructure operations.
- Built and launched UI infrastructure for two new cloud regions: Israel and Kazakhstan.
- Took two cloud products from inception to launch as technical lead: Cloud Center, a cloud-native operations platform, and Security Deck, a CNAPP product.
- Reduced common UI service image size by approximately 70% and lowered exposure to critical CVEs by leading the adoption of Distroless container images.
- Designed and operated a Fluent Bit logging pipeline handling approximately 12 MB/s, with Prometheus and Grafana monitoring and alerting.
- Led platform security improvements across UI services, including WAF integration and security-focused platform capabilities.
- Coordinated infrastructure work across up to 14 engineers while remaining hands-on in architecture, delivery, and production operations.

Yandex Cloud 2020 - 2022
Senior Software Engineer, Platform / Technical Lead Russia

- Designed and maintained deployment pipelines with TeamCity, Terraform, and Helm for Cloud Console and related services.
- Led the production migration of Yandex Cloud from cloud.yandex.ru to yandex.cloud.
- Migrated 30+ repositories from GitHub to Yandex's internal source-code platform.
- Supported production reliability for Cloud Console and related user-facing services through on-call rotations, incident response, root-cause analysis, and preventive fixes.

EARLIER SOFTWARE ENGINEERING EXPERIENCE

Yandex News 2018 - 2020
Senior Software Engineer / Technical Lead Russia

- Led frontend engineering for Yandex News and the launch of Yandex Sport, which reached 1.5M daily active users.
- Designed a shared React/TypeScript framework and led service migrations to it.
- Reduced the production VM footprint from 2,500 to 1,000 through application architecture, performance, and infrastructure improvements.
- Designed and implemented Protobuf support in a shared Yandex frontend library.

Mann, Ivanov and Ferber | Frontend Developer 2015 - 2018

Built and operated the company's e-commerce platform and supporting services with AngularJS, PHP, and Linux.
